to make windows and doors

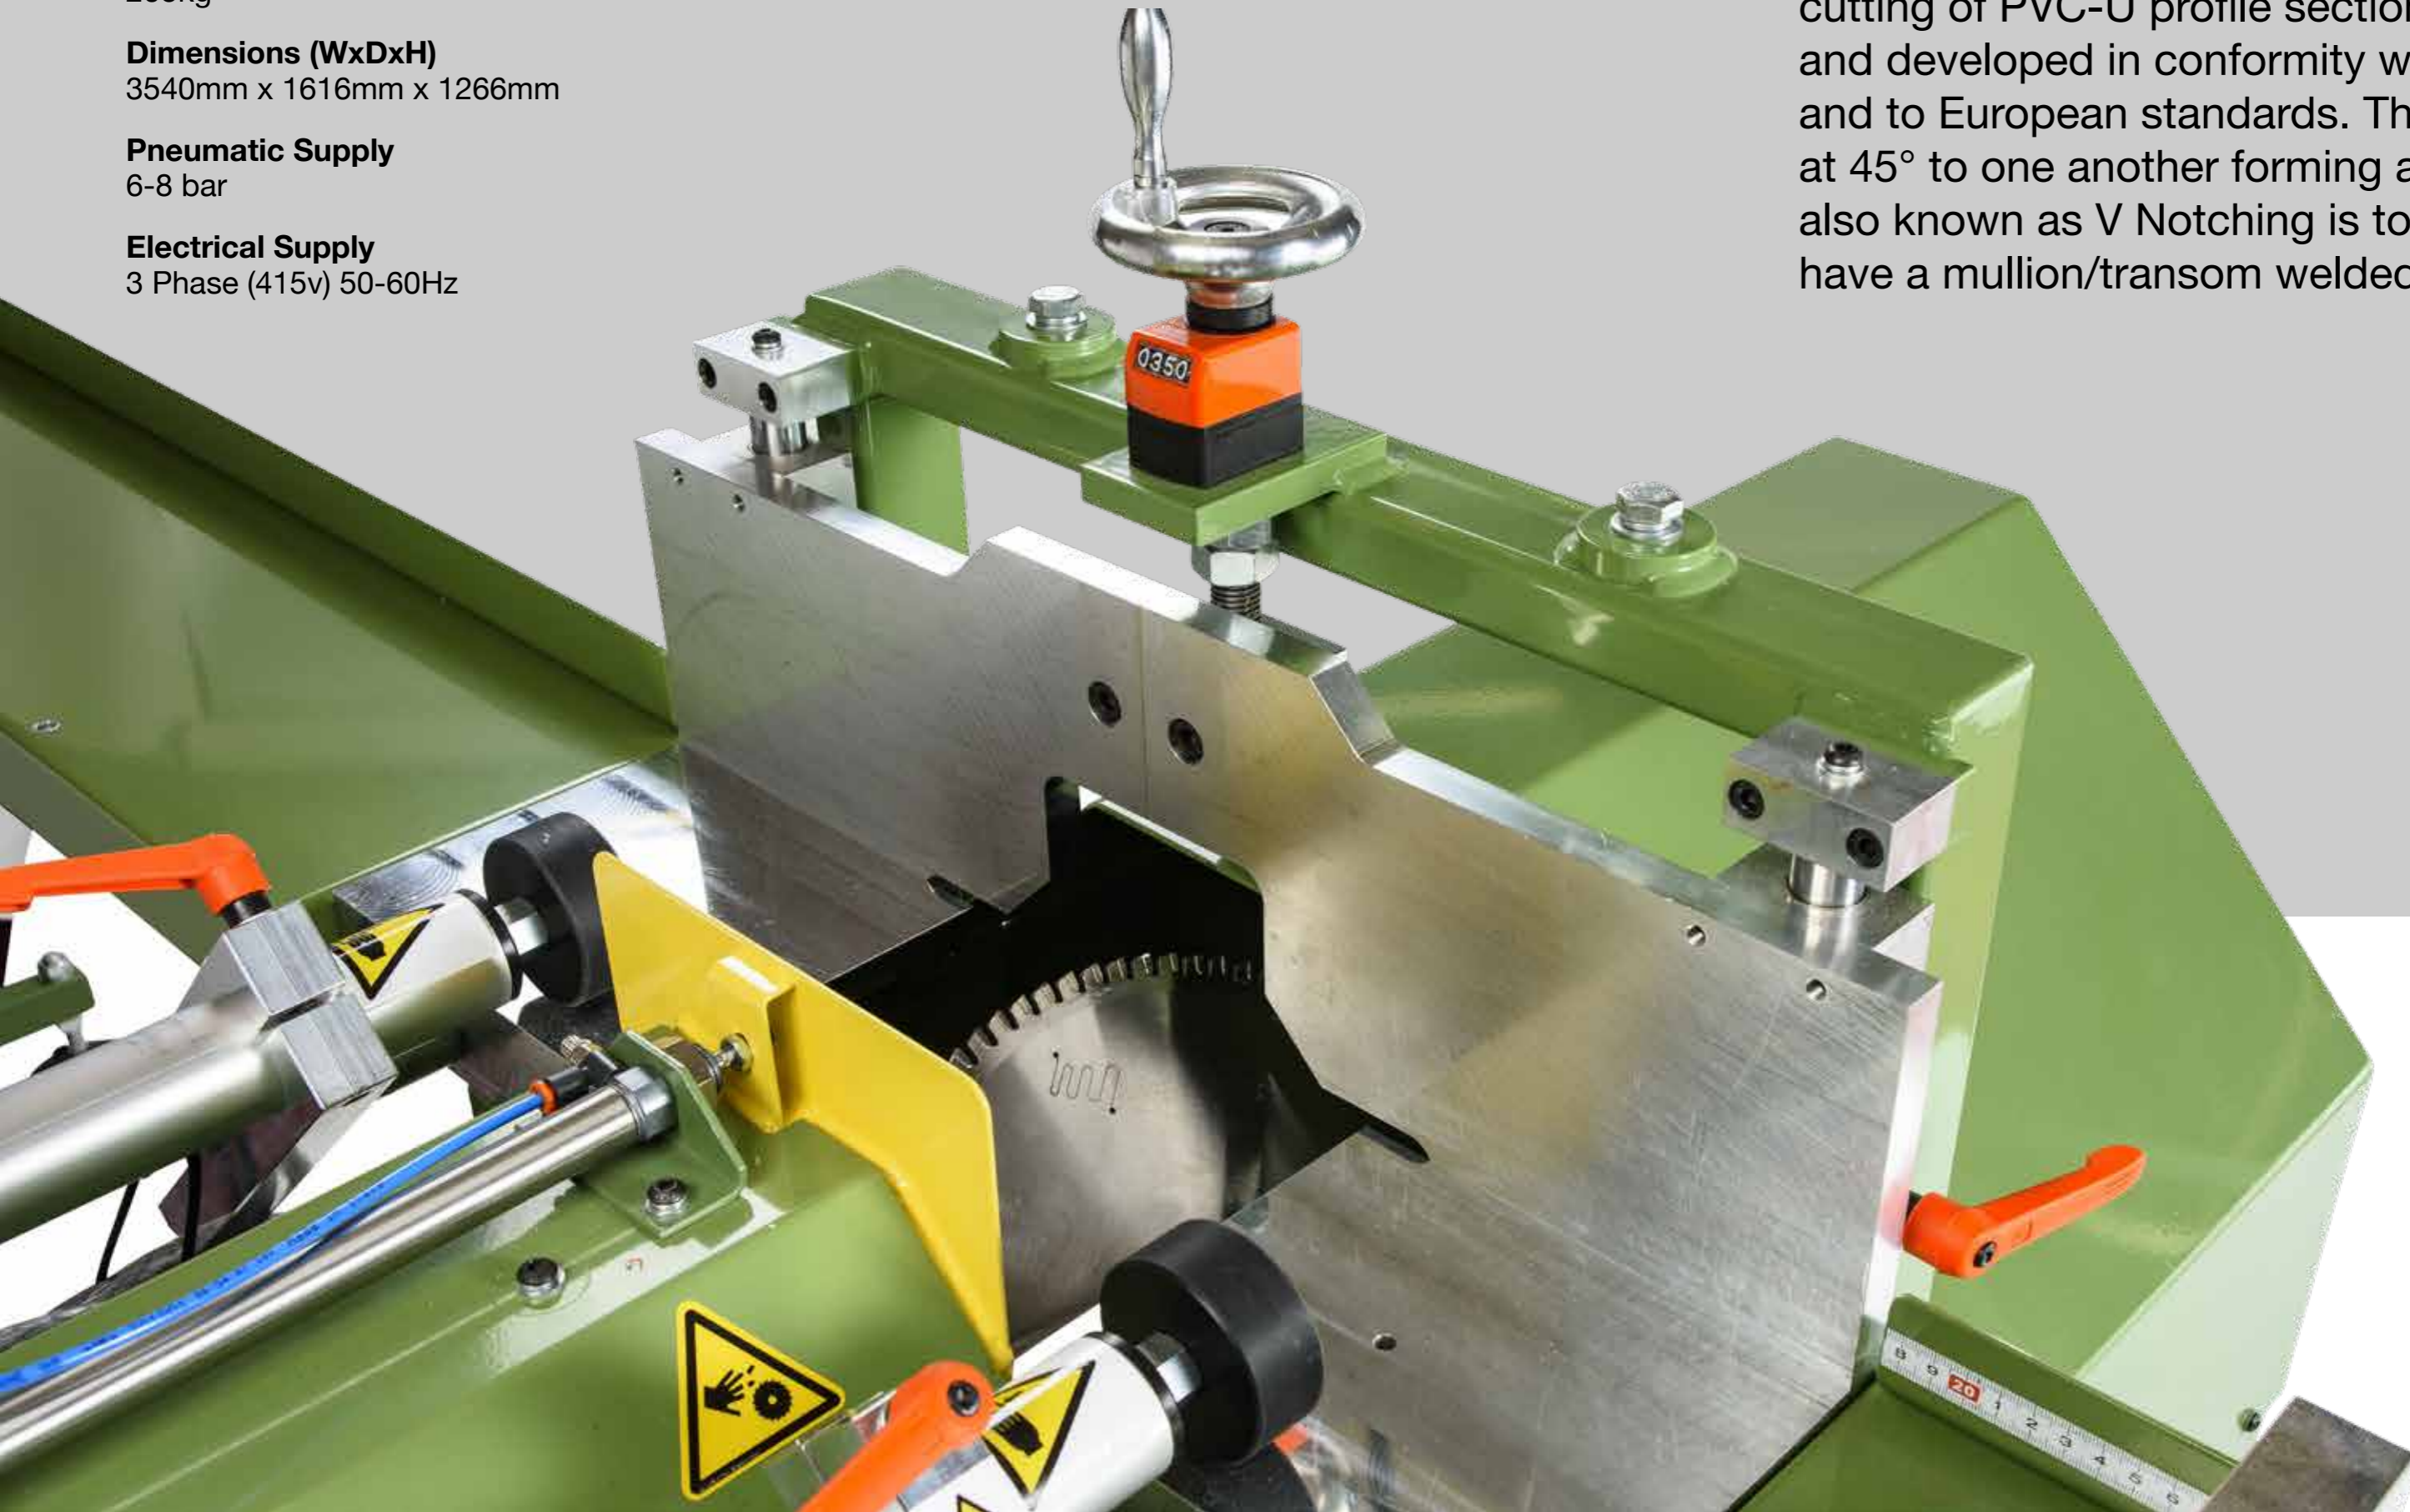

**Net Weight**  
205kg

**Dimensions (WxDxH)**  
3540mm x 1616mm x 1266mm

**Pneumatic Supply**  
6-8 bar

**Electrical Supply**  
3 Phase (415v) 50-60Hz

The VNS V-Notch Saw is intended for the professional cutting of PVC-U profile sections. It has been designed and developed in conformity with UK and EU directives and to European standards. The VNS has two blades set at 45° to one another forming a 90° angle. This process also known as V Notching is to allow a frame or sash to have a mullion/transom welded into it.

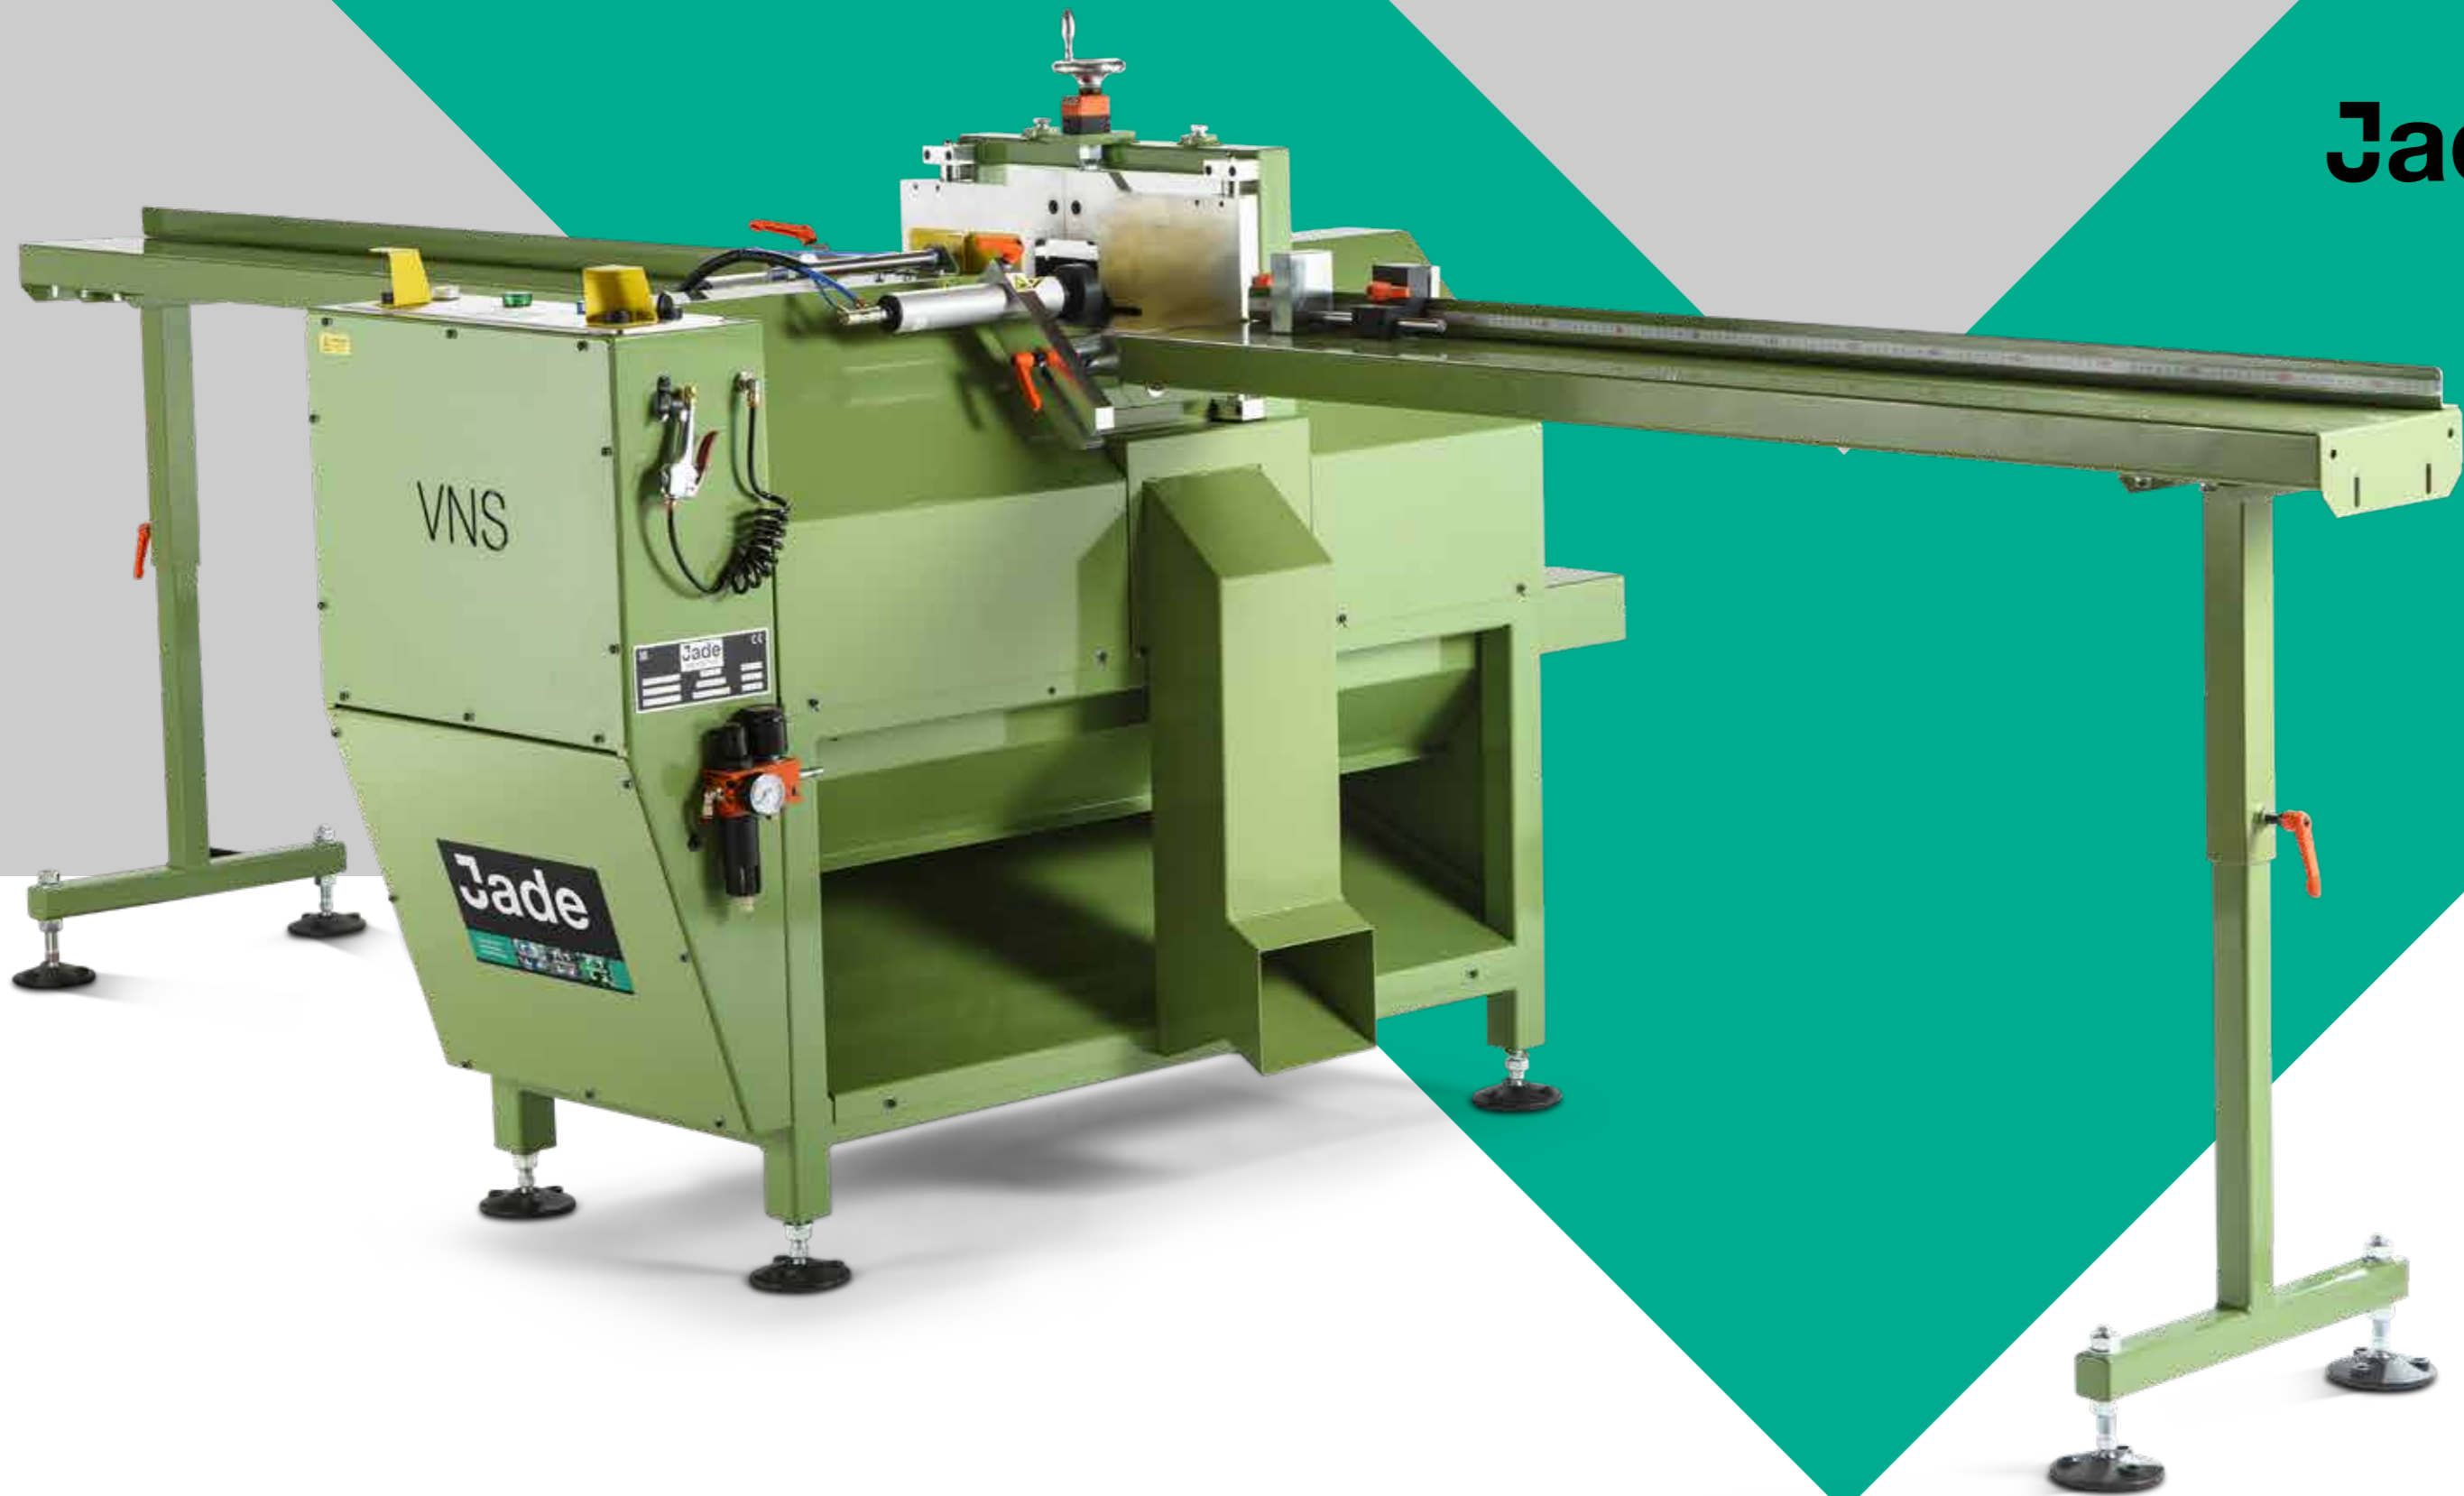

The saw is safely operated by using a two hand start sequence. Horizontal pneumatic clamp cylinders are easily adjustable to accommodate for different types of profiles ensuring optimum clamping.

The cutting depth is easily set by using the hand wheel adjuster complete with a digital position indicator. Automatic closing guard when the profile is clamped into place. Carefully designed waste disposal chute.

# Designing for your needs

Engineering and  
Design Expertise

Do you need a bespoke machine or tooling package to deliver a turnkey solution that will simplify your window and door fabrication?

With a unique manufacturing capability and hands-on industry knowledge, we analyse your requirements and challenges to establish the most relevant specialist machinery and bespoke tooling solution. We create digital assets of your requirements, allowing our design team to create software models and carry out physical pre-delivery trials.
